

Property Maintenance

Our wide range of building maintenance services includes painting and decorating, internal and external repairs, waste and rubbish removal – and just about everything in between! And if your property needs renovating, we can offer the best service to meet your needs by assessing your requirements and proposing a solution to suit your budget.

Garden maintenance & landscaping

A garden is often the first thing that greets prospective tenants, so providing a welcome that makes a lasting impression is vital. Our garden regeneration service includes knocking down and removing outbuildings, tree and hedge trimming, fence painting, repairs maintenance and the removal of garden rubbish, as well as the treatment of pest and vermin infestation, including the removal of fouling. We also offer a full landscaping design service.

Void deterrents & graffiti removal

Property assets, both commercial and residential, are often the targets of vandalism and anti-social behaviour. We will ensure the swift and efficient removal of graffiti from all surfaces and are fully trained and qualified to deal with bio-hazards, such as sharps and body fluids. Our services address other forms of anti-social behaviour and community management issues such as fly-tipping and extend to anti-climb paint applications, anti-fly-posting and the removal of abandoned vehicles. Sentrex also offers patrol services and security screens to safeguard properties.
